## HAPPY NEW YEAR!

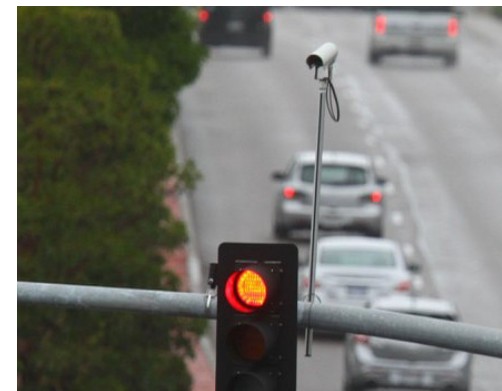

### Realignment of Teamwork Street - Camp Pendleton

LIN Consulting prepared a traffic study and conceptual design for the realignment of Teamwork Street at the intersection of Training Street within the limits of the air station at Camp Pendleton. The study and conceptual design focused on pedestrian safety, traffic efficiency and delivery vehicle operation. LIN Consulting interacted heavily with Camp Pendleton staff to discuss and determine the project's priorities and goals.

### Industry News- Smart Traffic Signals in Carlsbad

Carlsbad aiming at replacing all in-pavement electronic sensors with video cameras for all 178 traffic signals. Proven to be less costly to repair and replace as well as more accurate, the cameras will be aimed at improving traffic flow efficiency and lowering accident rates. The City confirms that these cameras are not for recording or taking photos of drivers or their passengers. The next step is to upgrade the system to "adaptive" traffic signal timing which will use real-time data to adjust signal timings for more efficient flows during peak periods of the day.
