I-15/Cajalco Road Improvements PS&E Project

The existing interchange will be upgraded to include a new 6 lane bridge on Cajalco Road across the freeway, a new NB on ramp, widening and the realignment of the existing on and off ramps and new traffic signals at the ramp termini. LCI is preparing the traffic engineering plans which include: the preparation of lighting and sign illumination for three new overhead structures, traffic signal, ramp meter, communications, signing and pavement delineation, and specifications and estimates. LIN Consulting has been very active with coordinating the designs between appropriate agencies through meetings with the Project Team.

LCI Turns 19!

Earlier this year, LIN Consulting celebrated 19 years of being in business. Since our humble roots in Rowland Heights, LCI has flourished into a firm with offices in Diamond Bar, Orange County and San Diego. Over our 19 years, LCI has earned a reputation for providing traffic, civil, and electrical engineering services both on time and under budget. We would first like to acknowledge our clients, throughout the years you have entrusted us with your projects throughout Southern California. By allowing us to serve you, you have allowed us to serve the public, which has always been our ultimate goal. It is because of our clients that we have been able to improve communities throughout Southern California. Secondly, we would like to thank all of our leaders and employees, both past and present. Our firm would not have made it this far without the hard work and dedication of our staff. Our Principals, Project Managers, Engineers and Administrative Staff have worked tirelessly to ensure that all projects are completed and that our firm continues to grow year by year. As we continue to grow as a company, we hope to maintain our strong work ethic and comradery in the workplace. For 19 years, this company has been working to improve communities and helping to create safer, more efficient roadways. We hope to continue this important work and hope that we can stretch our reach even further in the years to come.
