Freddy's Frozen Custard & Steakburgers

LIN Consulting provided traffic engineering services for the first-ever Freddy's Frozen Custard & Steakburgers franchise in the County of San Diego. The services included signing/striping design, pedestrian access comments and traffic circulation assessments. The project team prepared documents within a very short schedule to meet all deadlines set by the City of National City. LIN Consulting is very excited to be a part of this project as it brings one of the nation's favorite chains to town.

Industry News

It came as a big surprise that 71.2% of voters said they wanted an increase in LA County's sales tax for transportation projects. This money is aimed at relieving traffic congestion and providing alternative choices to driving. Measure M has come eight years after voters supported Measure R, a similar piece of legislation. Visit the following website to learn more about why voters acted to help drivers not waste as much as 80 hours a year in traffic.
